

Clark Norton  
Senior Airport Consultant,  
Tetra Tech Canada

Mr. Clark Norton is the Senior Consultant and Airport Specialist with Tetra Tech in the Airport Division in Ottawa, ON. He has over 40 years of work experience with 34 years of airport specific experience in areas of project management, airport planning, engineering, operations, and environmental management including noise management.

Mr. Norton is actively involved in airport planning, engineering construction, operational studies, business case development, auditing, and assessments and has been involved in numerous planning projects coast to coast, leading the projects on behalf of Tetra Tech.

Mr. Norton has worked extensively with owners, architects, engineering disciplines, and regulatory agencies. Mr. Norton is experienced with working in planning environments and understands the complex interaction between owners and operators, regulatory bodies, and local planning offices.
